

I am disturbed over the possibility that the FCC is considering allowing LPFM stations to take priority over current FM translator stations, specifically the possibility of allowing such a worthless LPFM station to pre-empt the programming of KLOVE Radio in our local market. Please do not allow such local programming to replace the excellent quality of the nationally broadcast service provided to us by KLOVE. It's the ONLY radio station in our market worth even listening to. The rest are basically broadcasting garbage! Thank you for your consideration in this matter.
